## Get Your Audio & Video Streaming Network Up and Running in Days!

MyGlobalCam is an innovative software platform that allows audio and video streaming from one or more generic cameras to one or more viewers, simultaneously, over the Internet. The video stream can be viewed with any browser-enabled device, so any company can offer video-conferencing, monitoring, chatting and web casting services without investing in expensive infrastructure.

## Our model offers unbeatable benefits.

For software developers and channel partners alike, MyGlobalCam offers the following features:

- Reduces bandwidth demands
- Enables fast time to market
- Completely customizable
- Easy to implement and use
- Highest levels of security
- Supports web cams to sophisticated IP cameras
- Record movies on hard drive instead of tapes
- Easy multiple-camera configuration
- Easy multiple-site monitoring
- Needs just a browser

### Benefits

- Private label branding – Your name goes on the product, enhancing your image to your customer base.
- Deploy new products and services – Significantly enhance your existing offerings.
- Attract new customers with a highly appealing offering.
- Make your existing customer base more profitable.
- Send customer loyalty soaring – Research shows customers are three-to-five times more likely to stay when they use more than one service
- Incredibly low cost of entry – Our model is affordable and easy to implement – completely risk-free – so there's no need to invest in new product development.
- Fast speed to market – You can be up and running in days.
- Take advantage of opportunities for advertising and banner revenue.
- Start your business with a simple website – MyGlobalCam provides all membership management and billing functionality for the partner
